

STATEMENT OF PURPOSE

RS24080

This legislation amends current law to limit the number of participating incubators so that there will be no more than twenty participants in the initial cohort. This legislation also provides that all moneys appropriated by the legislature, for the purpose of moving Idaho public schools toward mastery-based education, may be expended on behalf of local education agencies or distributed directly to the participating local education agencies at the discretion of the State Department of Education.

FISCAL NOTE

This legislation has no fiscal impact to state funds or to local authorities. The Superintendent of Public Instruction has requested additional moneys in FY 2017 for Mastery Education but this legislation only dictates how moneys may be disbursed as distinguished from the ultimate appropriation.
