

STATEMENT OF PURPOSE

RS24489

Amend existing law to require community colleges to follow the same requirements as school districts when acquiring and disposing of real property. Pursuant to § 33-601, Idaho Code, school districts are authorized to purchase real property and requires they have a property appraisal conducted of the property one (1) year prior to any purchase. Additional amendments add the reference to Section 33-601, Idaho Code to Eastern Idaho Technical College's provisions regarding real property. This section currently references the processes by which school districts use when acquiring and disposing of property but does not include the statutory reference.

FISCAL NOTE

The fiscal impact to the community colleges would be variable from year-to-year depending on their plans for purchasing real property. This is currently not an annual occurrence.
