5. IDAPA 02.06.21 - Rules for Voluntary Public Services of the Idaho Department of Agriculture Laboratories

The Idaho State Department of Agriculture submits notice of proposed rule at IDAPA 02.06.21 - Rules for Voluntary Public Services of the Idaho Department of Agriculture Laboratories. This is a proposed chapter repeal. According to the department, it is proposing to repeal the chapter because the primary mission of the Feed and Fertilizer Lab is to provide enforcement testing services in an accurate and timely manner. The department states that public service samples that are covered by this chapter do not benefit Idaho residents and tie up valuable lab space and time. The department indicates that since January 2014, the lab only had 28 such customers totaling \$18,114 of business. The department also adds that 84% of this work came from state agencies in Oregon and Michigan. The department also states that it halted voluntary service sample testing as of January, 2017. Negotiated rulemaking was conducted. The rulemaking appears to be authorized pursuant to Sections 22-604, 22-2006, 22-2204 and 25-2710, Idaho Code.

The following agency of the state of Idaho has prepared this synopsis as part of the proposed rulemaking for the chapter cited here under the docket number specified:

***Idaho State Department of Agriculture
IDAPA 02.02.14 - Rules for Weights and Measures.
Proposed Rulemaking - Docket No. 02-0214-1701***

Incorporating by reference fuel specifications from the American Society of Testing Materials (ASTM) is more practical and cost effective than reproducing similar specifications in Rule. Incorporating by reference the ASTM specifications ensures that Idaho's fuel specifications are consistent with neighboring states that refine and supply fuel for Idaho consumers.

Fuel in Idaho is sold under the true name and grade set forth in Idaho Code §37-2504 and must meet the quality standards set forth in Idaho Code §37-2506. Most of Idaho's fuel comes from refineries located in Utah, Montana, and Washington. These fuels already meet the most current ASTM fuel standards. Having current ASTM fuel standards will reduce the potential dumping of substandard fuel into the Idaho market and provide quality motor fuels for Idaho consumers.

Listed below is an overview of changes to ASTM Specifications Incorporation by Reference by ISDA Weights and Measures. A brief summary follows each change, or group of related changes.

- ASTM D4814 – Standard Specification for Automotive Spark Engine Fuel
- ASTM D975 – Standard Specifications for Diesel Fuel Oils
- ASTM D6751 – Standard Specifications for Blend Stock (B100) for Distillate Fuels

Summary of Changes to ASTM D4814 – Standard Specification for Automotive Spark Engine Fuel

ASTM	Title	Changes	Impact on Idaho
D4814	Table 1	Revised footnote D	Minimal
D4814	Table 1	Revised footnote F	Minimal
D4814	Subsection 5.2.3	Added DI equation	Minimal
D4814	Subsection 1.12.4	Discussion on DI Development	Minimal
D4814	Drivability Index	Changes equation	Minimal
D4814	Subsection 5.2.4	Revised from 10% to 15%	Minimal

- The 6 changes listed above occur in Table 1 “Vapor Pressure and Distillation Class Requirements”. These changes allow for ethanol blends up to 15% blended gasoline. Additional references have been added to the 2017 version that reference “Drivability Index”. The Drivability Index is a calculation used by ASTM to measure performance using different blends of ethanol in gasoline. These changes will have little impact in Idaho because all fuel currently transported into Idaho meet these requirements.

ASTM	Title	Changes	Impact on Idaho
D4814	Table 4	Maine vapor pressure	None
D4814	Table 8	Maine vapor pressure	None

- The 2 changes listed above only effect the State of Maine. These changes will not affect Idaho.

ASTM	Title	Changes	Impact on Idaho
D4814	Test Method D3831	Added Test Method D3831	Minimal

- This change adds a test to measure Manganese in gasoline. This change will have minimal impact in Idaho because the manganese volume is mostly determined at the refinery.

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D4814	Table 2	Revised Table 2	Minimal
-------	---------	-----------------	---------

D4814	Subsection 6.3	Added subsection	Minimal
-------	----------------	------------------	---------

- The 2 changes listed above in Table 2 “Detailed Requirements for all Volatility Classes” were revised to limit the amounts of Manganese content in gasoline. The 2017 edition lowers the acceptable levels of Methylcyclopentadienyl Manganese Tricarbonyl (MMT). This change will effect one retail establishment in Idaho that is currently adding additional MMT to their retail fuel supply. The overall impact is minimal.

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D4814	Denatured Fuel	Denatured fuel	Minimal
-------	----------------	----------------	---------

- The change listed above requires ethanol to meet an additional standard when being used to blend with gasoline. This change will have minimal impact in Idaho because the current ethanol base stock produced in Idaho meets both specifications.

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D4814	Vapor Liquid Ratio	Changed from 10% to 15%	Minimal
-------	--------------------	-------------------------	---------

- The change listed above allows for additional techniques and additional ethanol. This will have minimal impact in Idaho because refiners are currently meeting this specification.

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D4814	Section 1.12.5	15% Ethanol	Minimal
-------	----------------	-------------	---------

- The change listed above adds an equation to the 2017 edition explaining the distillation curve for gasolines containing 5% to 10% ethanol. This is an informational change and will have no impact in Idaho.

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D4814	Section 3.1.4	EPA Waivers	Minimal
-------	---------------	-------------	---------

D4814	Section 3.3.2	EPA Oxygenate Blend update	Minimal
-------	---------------	----------------------------	---------

D4814	Section 3.4.2	EPA Reformulated Gasoline	Minimal
-------	---------------	---------------------------	---------

D4814	Section 3.3.2	EPA Waivers	Minimal
-------	---------------	-------------	---------

- The 4 changes listed above update Environmental Protection Agency (EPA) waivers. These changes will have minimal impact in Idaho. Idaho currently adopts the EPA seasonal waiver for Reid Vapor Pressure (RVP).

ASTM	Title	Changes	Impact on Idaho
D4814	Section 3.5.3	EPA Certification Standards	Minimal

- The change listed above revises the EPA’s certification Standards for Deposit Control Gasoline Additives. It also increases the amount of ethanol within the certification from 10% in the 2007 edition to 15% in the 2017 edition. This will have minimal impact in Idaho. Fuels entering the state already meet this requirement.

ASTM	Title	Changes	Impact on Idaho
D4814	Section 3.2.3	Definition for finished fuel	Minimal
D4814	Section 3.2.11	Definition for water tolerance	Minimal

- The 2 changes listed above are additional definitions. The first change defines “finished fuel” and adds Test Method D4176 to the Referenced Documents. The second change adds a definition for “water tolerance”. These changes will have no impact in Idaho because the current standard (ASTM -07) meets this standard. Adding these definitions add clarity to the 2017 standard.

ASTM	Title	Changes	Impact on Idaho
D4814	Table 3, 4, 5, 6	Revised Table	None

- The change listed above specifically relates to the states of North Carolina, Georgia, and Alabama. This change will not affect Idaho.

Summary of Changes to ASTM D975 – Standard Specifications for Diesel Fuel Oils

ASTM	Title	Changes	Impact on Idaho
D975	Definitions	Added definitions	Minimal
		<ul style="list-style-type: none"> Added definition for “additive” and “alternative blend-stock”. This will have no impact. 	

ASTM	Title	Changes	Impact on Idaho
D975	Appendix 3	Revised Appendix 3	Minimal
		<ul style="list-style-type: none"> This change completely revises Appendix 3 to provide guidance for consumers of diesel fuels who may wish to store quantities of fuels for extended periods, or use diesel fuel in severe service areas, or high temperature applications. This change will have minimal impact on Idaho because it is for informational purposes only. 	

ASTM	Title	Changes	Impact on Idaho
D975	Subsection 6.2	Added subsection 6.2	Minimal
		<ul style="list-style-type: none"> This new addition addresses the “workmanship” specification for diesel fuel. It requires diesel fuel to be free of any adulterant or contaminant that renders the fuel unacceptable for its commonly used applications. This will have minimal impact in Idaho. 	

ASTM	Title	Changes	Impact on Idaho
D975	Subsection 7.3 and 7.5	Revised Subsections	Minimal
		<ul style="list-style-type: none"> This change revises subsections identifying “Alternative Fuels” and “Alternative Blend-stocks as alternative fuels. These changes will have minimal impact in Idaho. 	

ASTM	Title	Changes	Impact on Idaho
D975	Table 1	Revised footnotes	Minimal
		<ul style="list-style-type: none"> These changes allow for alternative Test Methods when the primary Test method is not available. This change will have minimal impact in Idaho because it identifies alternatives to Test Methods that are unavailable. It also adds greater flexibility to fuel quality laboratories that may be limited in their scope. 	

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D975	Subsection 7.3.1.3	Added Test Method D7861	Minimal
------	--------------------	-------------------------	---------

- This change allows for a specific Test Method in disputed cases, and identifies the specific Test Method used for final test result. This will have minimal impact in Idaho; however will add greater flexibility and clarity to fuel quality testing laboratories.

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D975	References	Removed ISO 16889	Minimal
------	------------	-------------------	---------

- This is a clerical change to remove “1999” from all ISO 16889 references. This change will have no impact on Idaho.

Summary of Changes to ASTM D6751 – Standard Specifications for Blend Stock (B100) for Distillate Fuels

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D6751	Reference	Added Test Method D7344	Minimal
-------	-----------	-------------------------	---------

D6751	Reference	Added Test Method D7345	Minimal
-------	-----------	-------------------------	---------

D6751	Reference	Added Test Method D7689	Minimal
-------	-----------	-------------------------	---------

- The 3 changes listed above add additional Test Methods. This will have minimal impact in Idaho because biofuels entering Idaho already meet similar standards.

ASTM	Title	Changes	Impact on Idaho
-------------	--------------	----------------	------------------------

D6751	Subsection 5.1.9	Revised subsection	Minimal
-------	------------------	--------------------	---------

- This change identifies a reference material source. This change will have no impact in Idaho.

02.06.21 – RULES FOR VOLUNTARY PUBLIC SERVICES OF
THE IDAHO DEPARTMENT OF AGRICULTURE LABORATORIES
DOCKET NO. 02-0621-1701 (CHAPTER REPEAL)
NOTICE OF RULEMAKING – PROPOSED RULE

AUTHORITY: In compliance with Section 67-5221(1), Idaho Code, notice is hereby given that this agency has initiated proposed rulemaking procedures. The action is authorized pursuant to Sections 22-604, 22-2006, 22-2204, and 25-2710, Idaho Code.

PUBLIC HEARING SCHEDULE: Public hearing(s) concerning this rulemaking will be scheduled if requested in writing by twenty-five (25) persons, a political subdivision, or an agency, not later than September 20, 2017.

The hearing site(s) will be accessible to persons with disabilities. Requests for accommodation must be made not later than five (5) days prior to the hearing, to the agency address below.

DESCRIPTIVE SUMMARY: The following is a nontechnical explanation of the substance and purpose of the proposed rulemaking:

Historically the Feed and Fertilizer (F&F) Laboratory's primary function (>90%) has been regulatory/enforcement testing. However, it occasionally accepts public service samples on a fee basis. Since January 2014, the lab had 28 customers totaling \$18,114.18 of business. Of that amount, 84% or \$15,223.35 came from two other State Agencies from Oregon and Michigan that use the ISDA F&F Lab because of its extremely low prices. The primary mission of the F&F Lab is to provide enforcement testing services in an accurate and timely manner. These public service samples, for the most part, do not even benefit Idaho residents and tie up valuable lab space and time. Therefore, the ISDA has halted voluntary service sample testing as of January 1st, 2017.

The ISDA is repealing the rule for voluntary public services.

FEE SUMMARY: The following is a specific description of the fee or charge imposed or increased: N/A

FISCAL IMPACT: The following is a specific description, if applicable, of any negative fiscal impact on the state general fund greater than ten thousand dollars (\$10,000) during the fiscal year resulting from this rulemaking: No fiscal impact is expected.

NEGOTIATED RULEMAKING: Pursuant to Section 67-5220(1), Idaho Code, negotiated rulemaking was conducted. The Notice of Intent to Promulgate Rules - Negotiated Rulemaking was published in the July 5, 2017 Idaho Administrative Bulletin, [Volume 17-7, page 27](#).

INCORPORATION BY REFERENCE: Pursuant to Section 67-5229(2)(a), Idaho Code, the following is a brief synopsis of why the materials cited are being incorporated by reference into this rule: N/A
