

STATEMENT OF PURPOSE

RS26630

The proposed legislation addresses in Idaho Code § 54-1019, the need for alternative qualifying criteria for residential and commercial electrical inspectors, while maintaining the high level of competency and experience that the statute intends. Many Idaho communities that perform inspections are experiencing difficulty in hiring qualified inspectors due to current qualifying criteria, which may delay a community's ability to perform electrical inspections. This would result in a negative impact on local economies. The legislation adds necessary qualifying criteria for electrical inspectors to address this need.

FISCAL NOTE

There is no impact to the General Fund because this legislation does nothing to change how the hiring process for inspectors is administered. Additional qualifications are added for persons that can be hired.
