

## STATEMENT OF PURPOSE

### RS26464C4

The amendment expands the existing authorization to access private lands to include private land surveyors. Licensed professional land surveyors are the only persons authorized by Idaho statute to provide legal surveys of private property boundaries. The authorization to access and locate necessary property corners and evidence related to boundaries enables land surveyors to conduct a proper survey. Surveys supported by all of the required evidence protect real property rights.

### FISCAL NOTE

There is no fiscal impact to the State of Idaho General Fund or the dedicated fund of the agency as the amendment addresses the manner in which private land surveyors conduct surveys and does not adversely impact the regulation of professional land survey licenses.
