

## STATEMENT OF PURPOSE

RS30289 / H0180

In the last 18 years, the money supply has grown by 200 percent, in other words, it has tripled. A tripling of the money supply will eventually accelerate the rate of inflation.

By adding physical gold and silver to Idaho Code 67-1210, the State Treasurer will be permitted to hold some portion of state funds in physical gold and silver to help secure state assets against the risks of inflation and financial turmoil and/or to achieve capital gains as measured in Federal Reserve Notes.

The new authority will be confined to holding gold and silver directly and in a manner that does not assume the counter party risks involved with other current state holdings, such as corporate bonds, treasury bills, and other debt instruments. This measure does not empower the State Treasurer to invest in paper instruments, futures contracts, or other gold and silver derivatives. The authority is confined to physical gold and silver, directly owned by the state and stored in a secure depository.

### FISCAL NOTE

This will have no direct impact on the General Fund as it grants a permission for the Treasurer to invest state idle moneys in precious metals. There may be some increase to the General Fund as investments may lead to larger returns and serve as a stronger hedge against inflation. There will be no fiscal impact on local entities, because this is strictly limited to only the State Treasurer.
