

# COLLEGE OF EASTERN IDAHO GENERATES CAREERS.

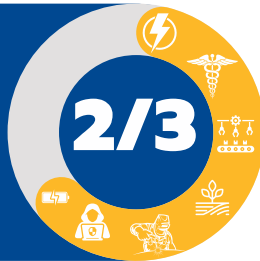

\*duplicated count \*\*unduplicated count

## THE CAREERS

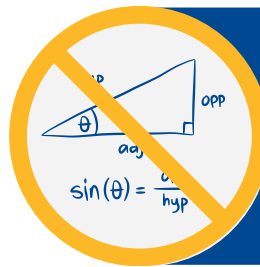

2/3 of regional careers require more than high school but less than a bachelor's degree.

That's CEI's specialty.

## THE MATH CHALLENGE

Insufficient math skills stop many students from getting into in-demand programs.

## THE PROBLEM

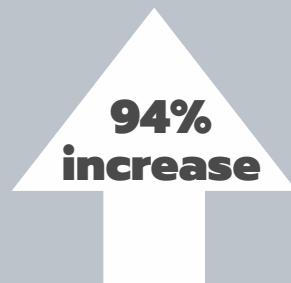

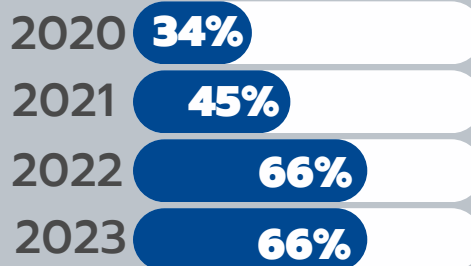

In 2020, only 1 in 3 students successfully completed remediation & the required course.

## CEI'S SOLUTION

- Change how we teach.
- Tailor course(s) to career path.
- Create hands-on application labs.
- Study student results, learn, and renovate again.

## THE RESULTS

Percent of remedial students passing the required course within 1 year.

You are always welcome at CEI!  
Questions? Concerns?
