

S1364: Amend 23-1003 to consolidate licensing for breweries and allow breweries to maintain their retail privileges should they exceed 30,000 barrels of annual production.

Key Points:

- This will simplify the brewery retail licenses from two options to one.
- This would not expand or diminish privileges allowed under the current licenses available.
- Every brewery would apply for a Brewers Retail License instead of picking between a Brewers Pub or Brewers License.
- A brewer would be able to continue retail operations should they exceed 30,000 barrels of annual production if they have maintained a continuous presence in Idaho for at least five years and have not committed any egregious violations of the law.

Would this increase the amount of beer in Idaho? No, this legislation will not change the supply or the demand for beer in Idaho.
