

## **STATEMENT OF PURPOSE**

### **RS24308**

This legislation implements Section 5520 of the 2016 Fixing America's Surface Transportation (FAST) Act, which modifies 49 U.S.C. §31111(b)(1). The modifications provide legal authority for the State of Idaho to allow a stinger-steered automobile transporter a vehicle length limitation of eighty (80) feet; as well as impose a front overhang of less than four (4) feet and a rear overhang of less than six (6) feet. Currently, Idaho Code §49-1010 allows a stinger-steered automobile transporter a vehicle length limitation of seventy-five (75) feet and a combined front and rear overhang of seven (7) feet.

### **FISCAL NOTE**

There is no fiscal impact to the General Fund. The Idaho Transportation Department (ITD) would be responsible for educating staff, industry and law enforcement, but this can be accomplished by written/electronic notification. Additionally, there are costs associated with updating the ITD Truckers Handbook, but this is done on an annual basis, so there is no quantifiable financial impact.
