

STATEMENT OF PURPOSE

RS24473

STATEMENT OF PURPOSE RS 24032 This legislation will allow Idaho State Police to utilize some unmarked patrol vehicles to address the issue of dangerous driving behaviors that are increasing the number of fatalities and injuries on Idaho's highways, interstates and roadways. These behaviors to be targeted include aggressive, impaired, reckless and inattentive drivers, as well as, distracted drivers. This legislation modifies the statute that requires Idaho State Police patrol vehicles to be marked in a specific way unique to Idaho State Police. However, the number of vehicles that can be utilized in this manner is limited to ten percent (10%) of the vehicles that Idaho State Police use for patrol purposes. This legislation will provide Idaho State Police the same authority that other law enforcement agencies in Idaho currently have to utilize some vehicles for traffic enforcement in high traffic and high crash areas where marked vehicles are not having an impact on dangerous driving behaviors. This legislation amends the requirement of a blue light to be mounted on top of each vehicle to instead require that a blue light be visible from any direction when activated. The light requirement will refine the statute to coincide with the current equipment available. Lastly, this legislation clarifies the procedure for other state agencies to utilize unmarked vehicles.

FISCAL NOTE

There is no fiscal impact to the General Fund or other funds.
