

STATEMENT OF PURPOSE

RS27269 / H0333

This proposal seeks to do two keys things, remove obsolete restrictions and distribute fees to the entity providing the service.

Consistent with the Red Tape Reduction Act and the Licensing Freedom Act, this proposal seeks to eliminate obsolete and unnecessary restrictions. Specifically, this proposal removes unnecessary requirements on automobile salesmen license renewals. Repealing code 49-1635 is in line with the Governor's executive orders. Although code refers to minimum sales as a part of salesman licensing renewals, this law provides no value to the licensing process, and is not a regulation that is relied on as a basis for determining renewals. The department believes that repealing section 49-1635 is in the best interest of the licensed salesmen by removing irrelevant regulations.

Additionally, this proposal seeks to distribute fees for Dealer and Salespeople identification cards to the entity that provides the service. This change will allow licensed individuals to opt into receiving their identification card directly from the department as part of their application instead of needing to take time away from their business to go a physical DMV location to obtain this ID.

This initiative has the support of industry and the Dealer Advisory Board, as it has been an idea that has been discussed as a means to clean-up unnecessary codes that provide no value to the industry.

FISCAL NOTE

There is no expected fiscal impact to the department, industry or customers, because there is no anticipated change in processes and the proposal aligns with current business practices. Additionally this proposal does not add or change any of the fees currently assessed.
