Subject: Comment on 2012 Energy Plan

I live in an area of Ada County “controlled” by a home owners association. The CC & Rs for our community strictly prohibit the addition of any solar energy devices to a home or lot. I would like to see the state enact legislation that would overturn restrictions such as these on the use of solar energy devices. It is my feeling that we should be doing everything possible to encourage the reasonable adoption of alternative energy sources and specifically those derived through application solar technologies. Although I favor the encouragement of solar devices, I believe the community should still have some ability to regulate these devices to ensure that the appearance of the community is maintained.
